

PowerLabDK

You are hereby invited for our
Grand Opening
23. June 2016, 9:00-16:30

PowerLab has provided Denmark with a new extended **platform for ground-breaking innovation, knowledge sharing, and test facilities**, which makes Denmark an international frontrunner within development and testing of future energy technology.

Join our grand opening and get updated on the newest trends in the field of development and results, which can determine the future of your company. Hear about how PowerLabDK can help your company with development and testing of new technologies and solutions.
